## Indica Azaleas

### HOW TO GROW AZALEAS

Azaleas of all types are easily grown if a few rules are followed. They require a good well drained soil that has a slight acid reaction. The addition of leaf mould, peat moss, and in a very heavy, stiff soil, a small amount of sand is always beneficial. Leaf mould and peat help maintain an acid soil, and a mulch of leaves is good to retain moisture and to furnish plant food for the next year. Partial shade is desirable in planting, but dense shade should be avoided.

**Brilliant** — A good grower with small, dark green leaves. Deep watermelon color, being intermediate between Pride of Mobile and Pride of Dorking. Very good variety.

**Fielder's White** — Large, pure white flowers early in season. A strong grower, free blooming, and one of the best white.

**Formosa** — Very fast grower with large dark leaves and big purplish pink flowers which have less purple than Phoenicia.

**Daphne Salmon** — Light salmon. Fast, compact, upright grower, very hardy and blooms profusely. One of the finest of the Indica azaleas.

**Pride of Mobile** — Lovely watermelon pink blooms regular and profusely cover the bushes. The larger plants cover with blooms to such an extent that the foliage is hardly visible, and even very small bushes make a wonderful display of flowers. It is a very hardy variety. We have the true Pride of Mobile,

## CLASS B CAMELLIAS

**Sarah Frost** — Flower very double, crimson, free bloomer at middle season. A vigorous grower.

**Elizabeth** — Very double pure white petals and crinkled at end. Once in a great while pure pink flowers of same form will appear. Good grower.

**Mrs. Abbey Wilder**—Peony shaped white flowers with tiny splashes of pink. Compact and good grower.

**Jarvis Red** — One of the deepest blood red shades with golden stamens. One of most popular kinds.

**Bealli Rosea** — Very double flowers of Pink Perfection shape, about same size, but color is a deeper pink. Fast and very compact grower with rather small leaves.

**Pope Pius IX**—Good size very double scarlet flowers; early to mid-season. Very good compact grower.

**Rose Emry** — Crimson peony form of medium size, early in season.

**T. K. Variegated** — Semi-double, light pink, with darker pink margin. Elegant form and coloring, with large cluster of yellow stamens. Fast compact grower.

**Sangdon** — Semi-double shell pink very fast grower.

**Prince Eugene Napoleon** — Very double large scarlet flowers. Blooms early to mid-season.

## RARE CAMELLIAS

We offer a carefully selected list of choice and outstanding varieties of rare *Camellia japonica* in a wide range of colors and sizes. Many of them have already made *Camellia* history and others will do likewise as they become better known. They are offered in classes and priced according to individual merit and supply available.

### GROUP A

**C. M. Hovey**—In habit of growth and shape and form of flowers, it is very much like Purple Emperor, but the beautiful, double, large red flowers are mottled with white. Very showy.

**Colonel Firey** (William S. Hastie). — Very large, extremely double flower, with many small petals of glowing rich crimson. A late bloomer.

**Diakagura**—Probably the earliest bloomer of all *Camellia japonicas*. In our section it is nearly always in bloom in September and often is showing color in August. Flowers large, thick peony-type, deep rose color with large white blotches, sometimes imbricated.

**Debutante** (Sara C. Hastie) — Delicate shade of solid pink; large peony-form. Very hardy.

**Pink Star** — Semi-double, bright rose-pink flowers of delicate coloring. Outer row of petals roundly pointed, giving star-like appearance. Habit of growth compact and upright. Midseason. Very desirable.

**Purple Emperor** (Mathotiana Rubra; Purple Dawn, etc.) — One of the largest flowers of rose form. Deep red, but as the flower gets older, outer edge turns purple.

**Rev. John G. Drayton** — Medium-sized, semi-double, peony-type flowers of soft clear pink. Entirely different from the variety known by this name on the Pacific Coast, which is clear white, and which is known in the Southeastern United States as *Grandiflora Alba* and *Alba Superba*.

**Snowdrift** — Beautiful form; large, semi-double; pure white.

**Victor Emanuel** — It is a bushy grower, compact and symmetrically round, with medium-sized leaves. The flowers are very large, deep red, peony-form and of indescribable beauty. Blooms late.

**Fanny Bollis** — Very large, semi-double red flowers blotched with white.

**Gigantea** — Very large leaves and spreading branches Red and white flowers are peony-form and of good size.

**Kumasaka, Variegated** — Large, peony-form blooms of deep pink but with white spots.

**Lady Clare** — Immense, single pink flowers. Probably the largest of all Camellias.

**Lady Van Sitti, Variegated** — Identical in growth and habit to the well-known pink variety, but the flowers are beautifully striped or marked with white. A good one.

**Laurel Leaf** — Flowers large, full double, with numerous narrow petals having recurved edges and opening very flat; light salmon-rose, marbled white. Upright and compact, with rather narrow foliage of a pleasing shade of green. Conspicuously beautiful.

**Marchioness of Exeter** — Early. Large pink flowers of peony-form, similar to Debutante, but a little deeper in color.

### - Prepaid Prices -

8 in. to 10 in. ....	2.50 each
10 in. to 15 in. ....	3.50 each
15 in. to 20 in. ....	4.50 each

We can furnish some varieties in larger sizes than listed; also other varieties quoted on request.

#### GROUP B

**Arajishi** — Similar to Prof. C. S. Sargent in color and form but later blooming and more spreading growth.

**Fred Sanders** — Flowers single, of medium size, crinkled at the edges. Otherwise, it resembles Tri-Color in both color and formation.

**Goshoguruma** — Good-sized, semi-double, deep red flowers with yellow anthers, making a most attractive color combination. Upright grower.

**Governor Mouton** — Flowers of medium size and blood-red color, often blotched with white. A vigorous grower, rather spreading in habit, with twiggy branches.

**Kimberly**—The brilliant red, single flowers have very prominent red stamens instead of white ones like other Camellias. Upright grower. A collector's variety.

**Kumasaka** — Large peony-form blooms of deep pink. Late.

**Monjisu (California Donkelaari)** — Semi-double, medium-sized flowers of bright carmine with a satin-like sheen. Foliage small, dark green.

**Pink Ball** — Color identical with Pink Perfection, but flowers much larger, double, with pompon center. Very attractive and has handsome foliage.

**Prince Albert**—Semi-double, pink, streaked or flecked with white, similar to Hermes in shape. Upright grower with serrated leaves.

**Purity** — Very double, symmetrical, pure white, star-shaped flowers, occasionally with stamens. One of the best of all whites. Upright grower.

**St. Elmo (Augusta Evans Wilson)** — Deep pink, thick peony-form, of good size and one of the earliest to bloom in fall. Upright grower with thick shiny leaves.

**Supresse Nobilissima** — Semi-double white flowers, very thin in texture, and elegant.

**Waterloo (Ethlington White)** — Large, semi-double pure white flowers of tissue-paper-like texture and very attractive. A profuse bloomer, even when quite young.

10 in. to 15 in. ....	2.50
15 in. to 20 in. ....	3.50

**Magnoliaeflora**—An extremely rare and valuable Camellia. The flowers are large, semi-double, with twelve to fourteen large petals, deep rose tinted at the base but fading to light blush near the tips.

8 in. ....	\$5.00
10 in. to 12 in. ....	8.00
15 in. grafted .....	15.00

Camellias are not difficult to grow. Many fine old specimen plants are to be found scattered throughout the Lower South, where they have been growing for years with but little care, and thriving on practically all types of land characteristic to the region. However, they prefer and do best on a good, well-drained soil that has a slight acid reaction. Good garden soil is suitable, but it can be made better by adding leaf mold and peat moss. In heavy, stiff soils a small quantity of sand is also beneficial. Half shady location is preferable.

### GRAFTED CAMELLIAS

Why they are superior to own-root plants

We are often asked why we cut down fine shapely Camellia plants and graft young shoots on the remaining trunks. Then, too, we are often asked why we charge so much for grafted Camellias. Here are the answers:

grows very vigorously and has thick, heavy, coarse branches. The leaves are exceptionally large and are very shiny dark green.

**C. M. Hovey** — In habit of growth and shape and form of flowers, it is very much like Purple Emperor, but the beautiful, double, large red flowers are mottled with white. Very showy.

**Colonel Firey (William S. Hastie)**. — Very large, extremely double flower, with many small petals of glowing rich crimson. A late bloomer.

**Diakagura**—Probably the earliest bloomer of all *Camellia japonicas*. In our section it is nearly always in bloom in September and often is showing color in August. Flowers large, thick peony-type, deep rose color with large white blotches, sometimes imbricated.

**Debutante (Sara C. Hastie)** — Delicate shade of solid pink; large peony-form. Very hardy.

**Imura** — Semi-double flower 5 to 6 inches in diameter, consisting of 15 large petals of a snowy white and porcelain texture and numerous yellow stamens in the center. The anthers of the flower is very large and shaped like an arrow or spear, very distinct from other varieties. Blooms mid-season. Leaves are large, narrow and long, smooth, very shiny dark green.

**Emperor of Russia**. A dazzling red hybrid that takes first place in any garden when it is in bloom. This brilliantly colored red flower is peony-like in form with golden stamens among the inner twisted petals. Very often the flowers appear to be four or five in one. Slow, bushy growth with dark green foliage. We consider this the finest red-flowering peony-form variety.

**Rising Sun** — This is one of the best single flowered Camellias that we have. The flower which is 4 to 5 inches in diameter opens flat showing 6 large petals and numerous yellow stamens. Certainly a beautiful flower — bright crimson red of velvety softness. Anthers are a bright yellow, filaments pink.

**Sara-Sa** — Semi-double flower 4 to 5 inches in diameter. Has 12 large petals and yellow stamens at the center. Flesh color dotted and striped with darker pink. Blooms mid-season. Large leaves; very vigorous grower.

**Rose Dawn** — Recently introduced from Mobile. The flower is large, full double, imbricated. Rose pink in color. Vigorous grower with slender branches.

**Gigantea**—Very large leaves and spreading branches. Red and white flowers are peony-form and of good size.

**Donkelaari** — Probably the most famous and best-liked of all the older Camellias. The flowers are large, semi-double, brick-red, flecked white, with attractive stamens in long crown. Very showy.

**Glen 40** — This is one of the finest of the newer varieties and has attracted a great deal of attention. Large, deep red, very double and with numerous rounded petals. Beautiful and lasting.

**Haku-Rakuten**. — A very beautiful and out-of-the-ordinary Camellia. The flowers are large, semi-double to loose peony form, and pure white in color. A vigorous and symmetrical grower with smooth, attractive foliage.

In selecting good plants such as CAMELLIAS — your plantings will serve as a memorial as they live for generations.

### What You Should NOT Do with Azaleas and Camellias

Do not spray in winter with Oil Emulsion.

Do not place soil or muck on the surface of the ground around Azaleas or Camellias after they have been planted.

Do not permit your plants to remain dry at the roots when cold weather is reported.

Do not cultivate around the roots.

Do not allow heavy cloth to rest directly on the plants in freezing weather.

Do not over-fertilize your plants at any time. (They are naturally slow growers and too much fertilizer will weaken them.)

Do not remove or loosen the burlap on Camellias.

Do not plant too deep. Do not plant on mound. Do not lift the plant by the trunk.

Do not plant them in poor unsuitable soil, they will not give satisfactory results.

A few choice CAMELLIAS planted each year and you soon have a valuable collection.

## CONIFEROUS EVERGREENS

**Sylvester Juniper** — One of the best Conifers for the South, with light green leaves of both scalelike and smooth type, can withstand city conditions and very hardy.

## OUR TENTH ANNIVERSARY

We are proud of our reputation gained and held during the first ten years of our service. The past few years have been rather hard due to increased business and lack of sufficient well trained help but we have endeavored at all times to give perfect satisfaction. We feel that we have succeeded in doing this judging from our many repeat orders and the number of original customers still with us.

To our old customers: We say thanks a lot for having exhibited your faith and confidence in us; may we have the pleasure of serving you many more years.

To our new customers: We sincerely appreciate the opportunity of serving you and will strive to give the service that will in time make you "one of our treasured old customers".
